Sample exam 2

The INFDEV team

1 Question 1

Given the following block of code, fill in the stack, heap, and PC with all the steps taken by the program at runtime.

- Points: *4 (50% of total).*

- Grading: one point per correctly filled-in execution step.

- Associated learning objective: *abstraction.*

```
1  interface Animal {
2    void makeSound();
3  }
4  class Dog : Animal {
5    public Dog() {
6    }
7    public void makeSound() {
8      System.out.println("Woof!");
9    }
10 }
11 class Cat : Animal {
12   public Cat() {
13   }
14   public void makeSound() {
15     System.out.println("Miao!");
16   }
17 }
18 Animal myAnimal = new Cat();
19 myAnimal.makeSound();
```

1. Stack:

PC
1

2. Stack:

PC
18

Heap:

1

3. Stack:

PC	...		PC	ret	this
18	...		13	null	ref 1

Heap:

1

4. Stack:

PC	...		PC	ret
18	...		13	ref 1

Heap:

1

5. Stack:

PC	myAnimal
19	ref 1

Heap:

1

6. Stack:

PC	...		PC	ret	this
19	...		15	null	ref 1

Heap:

1

7. Stack:

PC	...		PC	ret
19	...		15	null

Heap:

1

Output: `"Miao!"`

8. Stack:

PC	myAnimal
20	ref 1

Heap:

1

Output: `"Miao!"`

2 Question 2

Given the following block of code, fill in the declarations, class definitions, and PC with all steps taken by the compiler while type checking.

- Points: *4 (50% of total).*

- Grading: one point per correctly filled-in type checking step.

- Associated learning objective: *type checking.*

```
1  class Employee {
2    private String name;
3    public Employee() {
4    }
5    public string GetName() {
6      return this.name;
7    }
8  }
9  class Manager : Employee {
10   public Manager() {
11   }
12   public string GetFunction() {
13     return "I am the boss!";
```

```
14    }
15  }
16  ...
17  employee Employee = new Manager();
```

1. Declarations:

PC
1

2. Declarations:

PC
8

Classes:

Employee
Employee=Employee → Employee
GetName=Employee → string
name=string

3. Declarations:

PC
15

Classes:

Employee	Manager
Employee=Employee → Employee GetName=Employee → string name=string	GetFunction=Manager → string GetName=Employee → string Manager=Manager → Manager name=string

4. Declarations:

PC
17

Classes:

Employee	Manager
Employee=Employee → Employee GetName=Employee → string name=string	GetFunction=Manager → string GetName=Employee → string Manager=Manager → Manager name=string

5. Declarations:

PC	Employee
18	employee

Classes:

Employee	Manager
Employee=Employee → Employee GetName=Employee → string name=string	GetFunction=Manager → string GetName=Employee → string Manager=Manager → Manager name=string

4
